V3 Series Variable 3 Speed Pool Pump

- Energy saving variable 3 speed motor
- Reduce your electricity costs up to 70% per annum
- Reduce your Co2 emissions by more than 70%
- Ultra low noise operation
- Improved filtration

www.reltech.com.au

TAKE CONTROL OF YOUR POOL AND SPA'S RUNNING COST.

Reltech's Ecoflo V3 pump enables pool and spa owners the choice of how to run their pumps in the most efficient way so as to dramatically decrease electricity costs and carbon emissions.

Unlike conventional single speed pumps that work only at maximum capacity, the Ecoflo V3 pump utilises an award winning permanent magnet brushless 3 speed DC motor.

Whether you need to backwash, clean/vacuum or filter your pool or spa water, the Ecoflo V3 will save you time and money whilst minimising your carbon footprint on the environment.

Pool filtration takes up 99% of a pump's usage during the year. However, pool filtration does not require a pump to be running at full capacity. In fact, your pools filtration efficiency improves at lower flow rates. More foreign particles and waste can get trapped in the filter when water flow is slowed and prolonged.

The Ecoflo V3 operates at extremely low noise levels that allow you to run your pump at night to take advantage of off-peak tariffs without disturbing your neighbours

The Ecoflo V3 uses one of the most reliable and durable housing and internals currently available on the market. It's manufactured and assembled in Australia using a glass reinforced engineering grade polymer.

Reltech's Ecoflo V3 is covered by a limited 3 year warranty against materials and workmanship. (Please see the V3 operating manual for more details.)
